

GAS LEAKAGE MONITORING AND ALERTING SYSTEM

PROBLEM STATEMENT.....

General

Needs

Way to

Gas leakage monitoring and
ALERting system

So that

They can be used at
homes, buildings, industries
for detecting LPG,
propane, methane or any
other harmful gas
leakages and with some
changes could be used in
cities for detecting air
pollution and performing
analytics on the sensor
readings to predict and
prevent dangerous
situations

Government Agencies

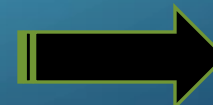

Needs

Way to

Check nanomaterials gas-
sensing capability of gas

So that

To prevent an
explosion or can help to prevent
worker injury..
